良钢精作 匠心铸美
ZHANG XIAO QUAN SINCE 1628

張小泉 SINCE 1628 QUAN

"Zhang Xiaoquan" was founded in the first year of Chongzhen of Ming Dynasty (1628 AD), is a famous Chinese time-honored brand with nearly 400 years of history. "Zhang Xiaoquan" always adheres to the ancestral motto of "Fine steel and fine workmanship", integrated with the modern spirit of "creative & artistic life", and formed a thousands of high-quality products system with knives and scissors as the core, covering kitchen supplies, daily necessities, personal care, garden hardware, copper and silver products, cultural and creative gifts and other fields, which sells good inland and abroad. Hangzhou Fuyang and Yangjiang Guangdong centers keep going neck and neck, further realize the modernization, intellectualization upgrade and development. For now it has become the "first stock" in the A-share market (stock code: 301055).

EXPERIMENT CENTER

Zhang Xiaoquan's production workshop provide a guarantee basis for the production capacity output. The Experiment Center ensures that Zhang Xiaoquan's products can pass the markets and consumers' inspection as it is the last barrier. The entire experiment center was designed and built according to ISO/IEC17025 standard.

Thanks to the excellent product quality and strong brand influence, Zhang Xiaoquan's products are exported to more than 40 countries and regions all around the world.

Blank making

As an intelligent production line with automatic blanking process, we can increase our operation efficiency and reduce the labor costs. These Zhang Xiaoquan's original production line, the uniqueness of automatic blanking result in higher safety and reduced risks and injuries cause by the operation. Updated the quality standard to make every blank standardization and industrialization.

Grinding

Our automatic grinding production line included rough grinding outer blade, rough grinding opening blade and fine grinding. The traditional production line is operated by many workers. But now it can be simplified into one person, which greatly saves the labor and increase the production capacity.

Assembling

There are total six groups intelligent equipments in automatic edging line. Through those machines, we can accomplish three processing steps: grinding, edging and burring. The edging angle and sharpness is very important for the knife. We have high requirements for ourselves, only to manufacture the products that our people need.

Automatic Packaging

Automatic knife set packaging Line can improve our work efficiency. Through the first inspection, final inspection and spot inspection processes to ensure the product quality. And also matched with two competent package processes of knife box and carton to guarantee the products is leakproof. Through the complete automatic packaging line, we improved the production efficiency, reduced material operation, and simplified the process, to complete the "one-line flow" packaging assumption and upgrade.

INTELLIGENT FACTORY

ZhangXiaoQuan Inc. is a modern life hardware enterprise integrating design, R&D, production, sales and service which was founded in 1628 with a history of nearly 400 years. By sticking to the principle of sincerity and trustworthiness, the brand has won more than 1000 awards and won international awards during its development process.

Now, the company has set up factories in Hangzhou, Zhejiang and Yangjiang, Guangdong, with 669 employees. Boasting a superior R&D team, we are able to customize our services according to various demands. We are always eager to learn the management experience of successful enterprises in order to improve our competitiveness in recent years. ZhangXiaoQuan staffs have been inheriting and carrying forward the ancestral motto of "The premium steel with the exquisite craft" over the years, and we are determined to forge ahead and constantly make breakthroughs at the same time. We strictly supervise the procurement of raw material and pay attention to each process from the initial production to the final packaging, so as to ensure the security and quality during production. The average monthly production capacity reaches as many as 13 million pieces.

ADVANCED R&D EQUIPMENTS

Zhang Xiaoquan's physical and chemical laboratory (phase I) is currently equipped with a series of professional tool hardware testing equipments such as salt spray tester, metallographic analyzer, element analyzer, chemical composition analyzer, roughness tester, professional hardness tester and sharpness tester, so as to provide professional data support for Zhang Xiaoquan's production testing and new products development.
